TECHNICAL SKILLS

Strong: JavaScript (ES6), HTML5, CSS3, jQuery, React, Angular, Node, Express, SQL, MongoDB, Git, REST API
Proficient: React-Native, Mocha, Chai, Redux, Redux-Sagas, Bootstrap, SASS, Grunt, Webpack, WebSockets

PROJECTS

Sonder | A Mobile Neighborhood Discovery Application | *Software Engineer*

- Developed mobile application with React-Native for efficient cross-platform deployment on iOS and Android.
- Implemented real-time location updates with Mapbox GL and WebSockets for reduced latency and server load.
- Managed application state with Redux for reliable, unidirectional data flow across modular front end components.
- Implemented authentication using Facebook SDK for streamlined and secure login workflow.
- Ingested user profile data from Facebook Graph API for frictionless personalization.

NewsGate | A News Analysis Application & Chrome Extension | *Software Engineer*

- Measured trends with IBM Watson, Twitter, and Google Trends APIs for timely and accurate document analysis.
- Developed nimble interface for Chrome Extension with jQuery for quick document traversal and manipulation.
- Architected scraper daemon with Node for efficient gathering and rendering of fresh content.

Around80 | A Travel Discovery Application | *Software Engineer*

- Geolocated images with Flickr and Google Maps APIs for instant access to high-quality imagery and accurate location results via Angular views.
- Architected schemas with MongoDB and Mongoose for rapid development and easy iteration.
- Engineered RESTful APIs with Node and Express to ensure backend extensibility and scalability.

Newsly | A World News Aggregation Application | *Software Engineer*

- Engineered server with Node and Express for high performance and responsiveness to requests.
- Integrated Reddit API and Angular controller via REST for efficient data rendering.
- Achieved 100% client/server test coverage with automated Mocha and Chai test suite, for enhanced stability and maintainability.

PROFESSIONAL EXPERIENCE

Oracle | *Business Development Consultant*

Redwood Shores, CA | 2016

- Managed full sales cycles (forecasts, demos, pipeline, revenue generation) in key enterprise accounts for Oracle's Customer Experience Cloud Solutions (Sales Automation/ CRM, Marketing Automation, Social Listening).
- Q4FY16: 200% quota attained; \$715 pipeline generation; Early Achiever Award; 1st Place, Mentor Quota Contest.
- Q1FY17: 100% quota attained; \$420K pipeline generation; Oracle Champions Social Seller; Class of Aug. '16 Mentor.

UC Berkeley Kresge Engineering Library | *Technical Processor & Circulation Lead*

Berkeley, CA | 2014- 2016

- Developed database queries to analyze and update monograph records; achieved 110% of collection storage goal.
- Trained and supervised 10+ circulation attendants in performing database queries, updating monograph and patron records, and using Millennium (integrated library system software) for circulation projects.

EDUCATION

Hack Reactor | *Advanced Software Engineering Immersive*

2016- 2017

University of California, Berkeley | *B.A., Philosophy*

2012- 2015
